Good morning Robin,

there is third project the PDS of which I attached to this email. To the latter PMI will contribute as well. 1401 and 1402 will be done mainly by myself with some minor contributions by others.

Regards,

Martin

Dear Martin,

Will you be the only internal resource on these projects?

Also, you mention 3 projects here. I only have project data sheets for Project No 1401, Exercise Performance of Adults Smoking ACCORD or Conventional Cigarettes and Project NO 1402, Influence of Smoking the HHCSS ACCORD K3/K6 Puff Activated Lighter on Endothelium-Dependent Venoreactivity. The third attachment on the file that Hans forwarded me was your Outlook address contact. Shouldn't I have another project data sheet?

Thanks,

Robin

Dear Robin,

the ETS Exercise Study is a separate one but will be based on the Exercise trial conducted in RSA. Since the RSA trial is schedule to start in March with its clinical part those data will be available before starting the ETS trial.
Time estimate is very vague, since it also depends on my contribution to presentation and publication. For the Exercise in RSA I shall have to travel to RSA gain. Taken this into account we have to estimate about 400 man-hours.
For ETS it should be around 600 man-hours.

Endothelial Dysfunction should be around 300 man-hours.

In case of any questions, just give me a call.

Martin

Dear Martin,

I have 2 questions concerning the attached project sheets.

- After the planning meeting, Hans set up the list of projects and assigned leaders. He assigned you to the Accord Exercise Study and the Accord Endothelial Function Study and a third project, Effect of acute ETS exposure on exercise performance. In reading your project sheets, I gather that the ETS exposure study has been included in the "Exercise Performance of Adults Smoking ACCORD or Conventional Cigarettes" project data sheet. Please correct me if I am wrong.
- My second question/request centers around the Resource Allocations. I will need specific names and an estimate of the number of hours you will need that particular resource. This information is necessary for me to compile total resource allocations for WSA and present it to Rick on the 4th of February. This type of information will help us distribute resources and identify resource needs.

Thank you for your time in this matter.

Robin Phillips

Hans, as requested,

have a safe trip!

Martin
